

Hi, Menka

I am happy to review your project today

Mockups

- all sketches are good

Dashboard

Fully complies with the technical specifications, all visualizations are clear and easy to read, great structure and design

Here just few tiny genral recommendations (not critical):

- if you use labels on the bars you can remove y-axis
- sometimes it is better to swap rows and columns that we can read better axis ticks
- please pay attention to tooltips - you can change text and format values

Presentation

- great structure
- you paid attention to all the insights and details of the analysis
- and what is most valuable for business - you suggested further steps and recommendations

Brilliant project. There are no critical comments so

I am happy to say that your project has been accepted

Keep up good work and good luck in the next sprint

- reviewer
