

Hello Menka!

The dashboard is easy to read, you brilliantly and precisely answered all the questions. I also want to note that the visualizations themselves are designed very clearly, this makes it easier to understand the information on dashboard, great!

I have no critical comments on the decision of the project and I am ready to accept it.

Thank you for your work and wish you success in the following projects!)

---

I can also recommend one source that may help you make your dashboards better in the future. Maybe it will be useful for you:
