Hello Menka!

I'm happy to review your project today.

In general, the graphs are made with high quality, and show all the necessary information.I would especially like that conclusions and comments make the analysis more flexible and of high quality. Great work!

What we can add (option):

- it would be informative to add a link to the Google sheet to see the table with values.

I'm glad to say that your project has been accepted.

Keep at it. You're improving every day! :)
